

## INCOIS researchers, France scientists discovered oscillation of sea level across Tropical Indian Ocean

Hyderabad, Mar 19 (UNI) A group of researchers working at the Indian National Centre for Ocean Information Services (INCOIS) in collaboration with scientists from France, have discovered the existence of a synchronous oscillation of sea level across the entire Tropical Indian Ocean with a time period of 30-80 days during the winter months from December to April.

This work has been published in the latest issue of Nature Communications. (Rohith et al.
